Update of the "Production Board/JIIRG Status Board"(cont'd):

KH-7, KH-8 in Minicard

[redacted] indicated the status board report of "8 missions completed" reflected only the coding being complete in CSD. (IPD's status will be shown in future updatings to the status board.) STAT

Unified Target List

The chairman asked CSD to present a briefing in the next meeting on the Unified Target List program.

Comments on the "Object File"

[redacted] suggested reproducing for dissemination the "object file" charts which were presented by Mr. Brugioni in the 23 March 67 Production Board. The Board concurred. STAT

During the discussion of the file it was pointed out that Appendix "P" of the JIIRG only gave generalities as to a files composition/ application and further consideration would be required to determine if the file needs to exist.

The chairman asked [redacted] if he would prepare a paper reflecting the JIIRG concept of the object file, possibly bringing out the need, use, as well as the NPIC capability for accomplishing such an effort. It was further suggested that the reproduction of Mr. Brugioni's 23 March presentation be attached to [redacted] paper (subsequent to the meeting it was determined that such a packet be attached to [redacted] paper and distributed with the Production Board Agenda for 13 April 1967). STAT STAT STAT

[redacted] asked that this be deferred until a later date. STAT
